

## PROTECTING YOUR BIGGEST INVESTMENT

Vulcan Pest Control has been solving pest problems in many communities for over 25 years. We are a family owned and operated business. That means we can provide you with prompt, reliable, and friendly service.

We provide the personal service and expertise you can count on! Today we continue providing effective residential and commercial pest control solutions. And, because of our reputation for reliability, you can be rest assured that every effort is made to maintain service schedules.

We understand how important dependable service is to you and our highly trained pest control technicians will take care of any pest issue you may have. At Vulcan Pest Control we will take every precaution to assure your health and safety during the application of any materials deemed necessary.

### Trained and Licensed

We are fully trained in all aspects of pest management and termite inspections. We can handle any pest problem related to your home or business from spiders, termites, bees, rodents, and many other pests.

**Our commitment to service is guaranteed!**  
**Your satisfaction is our number one priority!**

**We're Large Enough To Accomodate But Small Enough To Care!**

**IT'S YOUR HOUSE, NOT THEIRS!**

Since pests will never stop trying to gain access to your home, it makes sense to have a maintenance plan in place for protection throughout the year. That's where we can help. At Vulcan Pest Control we can identify and treat any current pest problems you may be having,

then develop a customized plan with regularly scheduled visits for ongoing protection.

During our initial visit, we'll inspect the inside and outside of your home, then apply the appropriate treatments for any unwelcomed invaders. We'll be sure to closely examine and treat those areas where pests are likely to be found, including cracks, crevices, bathrooms, attics, kitchens, behind and under cabinets, and water heater closets.

To help stop additional pests from coming inside, we'll apply a protective barrier treatment to the outside of your home, paying special attention to your foundation, door and window sills, and anywhere else that may offer access to the inside.

We offer professional bee removal with proper equipment and procedures to provide safe areas for work and play. Our removal methods are effective and guaranteed. To eliminate bees without the hazard of attacking neighbors and bystanders call us @ 1-800-346-0971.

## OUR SERVICES

### Structural Fumigation (Tenting)

Fumigation is 100% effective at eliminating drywood termites. Fumigation is one of the most effective ways to fully eradicate drywood termites, bed bugs, and wood boring beetles.

### Termites - A Constant Threat To Your Home

Termites won't be going away anytime soon. These destructive pests have been around for over 250 million years, and they're able to adapt to a wide variety of environments. It's not uncommon to have multiple termite colonies in the soil around your home at any given time, with hundreds of thousands of termites in each colony.

That's where Vulcan Pest Control can help. With a program designed specifically for your construction type, species and preferences we can rid your home of destructive termites and keep them from coming back in the future.
