

The Process

ABC Building Inspections, I.I.C., carefully inspects and reports on visible and accessible systems and components of the structure, utilizing national standards and state-of-the-art report writing software. Each report is customized with photographs describing the conditions of the following building systems and components:

- Exterior Building Components
- Roofing and Gutter Systems
- Garages, Porches & Decks
- Attic Structure, Insulation and Ventilation
- Basements and Crawl Spaces
- Conditions of Interior Rooms
- Fireplaces and Wood Stoves
- Heating and Cooling Systems
- Plumbing and Electrical Systems
- Fire and Life Safety Issues
- Structure - including framing and foundation

In addition to performing building inspections, ABC Building Inspections, LLC will also arrange for testing and inspection of:

- Water quality
- Radon air and water
- Septic
- Lead paint
- Wood destroying insect

Water & Radon tests are sent from a state certified lab.
